Important Notice

The purpose of this white paper is to present Negexc Exchange and NGX (Negexc Token) to potential token holders in connection with the proposed ICO. In the details of this White Paper, it is only intended for, made or directed to, only people outside the United States, Republic of Singapore, and / or the People's Republic of China (who will exclude [Hong Kong Special Administrative Region of the People's Republic of China, Administrative Region Especially Macau from the People's Republic of China, and Taiwan])) ("China"), and can be followed up only by people outside the United States, the Republic of Singapore, and / or the PRC. Nothing in this white book is considered to be a prospectus of any kind or a request for investment, nor in any way relating to bidding or requesting an offer to buy any securities in any jurisdiction

1.1 PROBLEMS IN CRYPTO

1.2 GROWTH OF THE CRYPTO MARKET

1.1 Problems in Crypto Exchange

➤ Website security is vulnerable to hacker attacks

As a user who is experienced in crypto buying and selling transactions, the team fully understands the problems faced by players. there is a hacker attack on the exchange that has an impact on the panic of the asset holders who will lose the assets they have. With the Negexc exchange, we will do the best so that it doesn't happen

➤ Slow customer service

Customer service is very important to help users who want to withdraw funds, send assets, want to replace personal data, or experience problems. If customer service is slow in assisting or servicing it, this causes a decrease in the user's trust and comfort in the exchange. At us, the trust and convenience of using number one

➤ Relatively high transaction costs

Sometimes one of the obstacles or complaints of users in exchanging is transaction costs. Transaction costs that are too expensive make use of trading when the market is experiencing price stability. For this reason, we present a transaction fee that is relatively not too high to always activate the market under any conditions

➤ Server that is easy to down time

when fluctuations occur in a coin, players will usually be very disadvantaged by the server constraints that suddenly come down. This has a very bad impact on asset holders and not

➤ Display website interface that seems complicated

a complicated interface will make it difficult for users to trade, because not all users are familiar with it. A good interface display is a display that looks simple but has complete features

1.2 Growth of the Crypto Market

The global cryptocurrency market is expected to grow at a spectacular rate due to the increasing demand for digital payments. Bitcoin is leading the global market because it was the first company to introduce digital currency in 2009. Although Litecoin is expected to attract more attention during the forecast period due to the increasing use of cryptocurrency in users over the past few years. Other currencies such as Ripple, Namecoin, and Ethereum also stand out on the market. Global investors decide which currency will gain momentum in the cryptocurrency market globally. Increased use of blockchain technology in finance is being applied to create innovative products, enabling end users to adopt cryptocurrency. This will ultimately lead to the growth of the financial industry globally. Some of the leading key players in the global cryptocurrency market include BitGo, Xilinx Inc., BTL Group Ltd., Alphapoint Corp., Advanced Micro Devices, Inc., NVIDIA Corp., Intel Corp., BitFury Group Ltd., and Microsoft Corp

The global market for cryptocurrency is worth US \$ 574.3 million in 2017 and is estimated to be worth US \$ 6702.1 million by the end of 2025. The overall market is expected to grow at a star CAGR of 31.3% during the valuation period 2017 to 2025.

Market for cryptocurrency segmented into software and hardware. The hardware segment is likely to dominate the global market during the forecast period. By region, the cryptocurrency market is fragmented to Europe, North America, Asia Pacific and Latin America. Of these, Europe is expected to be responsible for the majority of market share during the forecast period due to the presence of many mining collections. North America also tends to offer big growth opportunities in the future

The Blockchain market for the Asia Pacific region seems to be still warm and fertile to date. This can be seen from the increase in investment in Blockchain technology by venture capitalists.

Support in the form of government initiatives and policies also adds to market demand for Blockchain technology in this region. In addition, the growth in the number of Blockchain and ICO-based startups is also increasingly driving the Blockchain market share. This growth is expected to reach 87% in 2024.

Trend of Initial Coin Offerings (ICO) also supports the growth of Blockchain in the Asian market. The Blockchain company began offering ICO as a sale of coins & tokens and to raise funds. In 2017, the initial coin offer has raised more than USD 2 billion with more than 250 ICOs worldwide. This token can then be traded on the cryptocurrency exchange. ICO provides initial access to potential protocols and Blockchain applications. This encourages investors to invest in ICO.

2.1 INTRODUCTION NEGEXC EXCHANGE

2.2 NEGEXC EXCHANGE FEATURES

2.3 MODEL REVENUE

2

2.1 Introduction Negexc Exchange

Negexc (Next Generation Exchange Crypto) is a different exchange platform than others. We are here to offer various solutions to problems that already exist in the world of crypto exchange markets. In addition, we will always invite users to participate in the importance of creativity and user needs. Because of our vision and mission, we create crypto exchanges that prioritize the comfort and security of our users

3.1 INTRODUCTION NEGEXC TOKEN

3.2 NEGEXC TOKEN FUNCTION

3.3 TOKEN ALLOCATION

3.4 FUND ALLOCATION

3

3.1 Introduction Negexc Token

Negexc tokens are standard ERC-20 tokens. The purpose of this token was made to raise funds to build a start up of Negexc exchanges through ICO. In addition, Negexc tokens will become assets that have many functions in our exchange and make Negexc crypto assets secure in the future with the plans that we make

Token Details

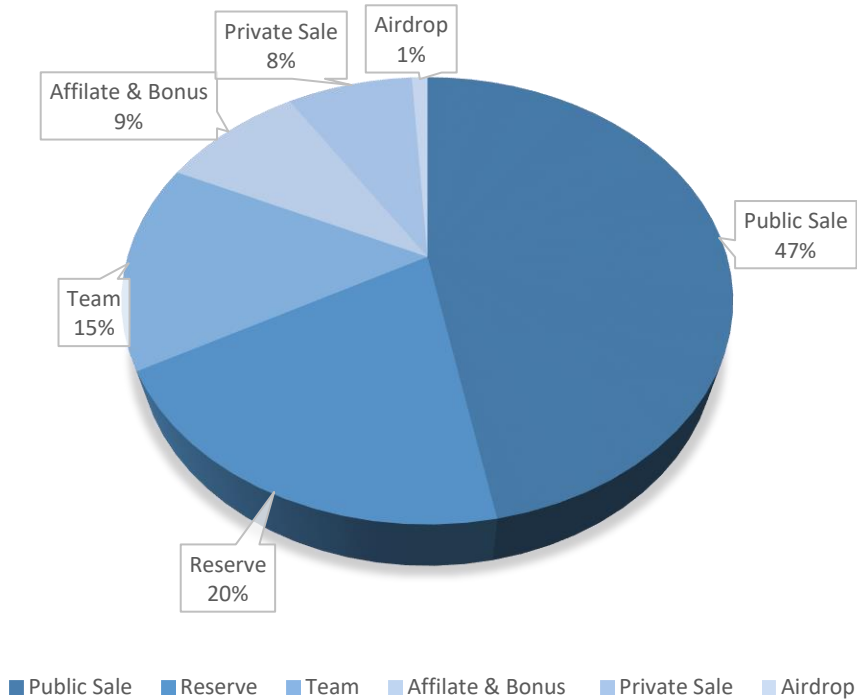

- Name** : Negexc
- Ticker** : NGX
- Decimals** : 18
- Standar** : Ethereum Standar Token (ERC-20)
- Total Supply** : 3.300.000.000 NGX

3.2 Negexc Token Function

- 1) Listing Payment**
- 2) Exchange Fees**
- 3) Other Fees**

3.3 Token Allocation

of the total supply of 3.3 billion tokens that are in place, we will allocate these tokens according to the above. We detailed each of these allocations as follows

1) Public Sale (ICO)

ICO stands for Initial Coin Offering, which means a start-up or team that wants to run their project or project and uses the ICO method to get funding (crowdfunding), by participating in ico, by sending funds through the payment method that has been specify then we will get a token from the project.

Through the ICO method there are many advantages that can be obtained:

- Projects that are being planned can be quickly implemented and tried whether the project is successful or not
- Can encourage the development or advancement of technology through ideas that are born from new start-ups that appear throughout the world

public sale will be divided into 3 phase

1. Public Sale Phase 1
